

# Self Integrating Systems for Better Living Environments

By Ralf Dörner

Shaker Verlag Dez 2010, 2010. Buch. Book Condition: Neu. Neuware - Information and communication technology is a major factor that will shape the way how we will be living in the future. This translates in particular to our living environments, the private spaces, dwelling places, living quarters we will inhabit. Here, information and communication technology has not only the potential to make our lives more comfortable - it can address vital aspects. One example, which is of utmost importance in an aging society, is the support of elderly people in their homes. Ambient assisted living is a term coined to describe a goal many research efforts strive to reach. One promising approach to enhance private living environments is to equip them with systems that possess a distinctive feature: self-integration. Self-integration is together with other system properties such as self-organization, self-configuration, self-healing, self-adaption, self-stabilization, self-protection a central principle for managing highly complex, autonomous systems. Future living environments will benefit greatly from the development of algorithms and systems that offer secure and transparent communication relying on adaptive, self-integrating IT-systems. With communication, we denote the communication between technical systems as well as the communication between information and communication technology and residents in private...
