LOCALIZATION EFFECTS IN DISORDERED III-V SEMICONDUCTOR NANOSTRUCTURES

Cuvillier Verlag Dez 2015, 2015. Taschenbuch. Book Condition: Neu. 211x149x9 mm. Neuware - Due to the increasing demands industrially as well as scientifically on new optoelectronic devices for specific applications, semiconductor materials with desired energy band-gap are needed. In this context, alloying provides the ability to tailor the energy band gap of a compound semiconductor (ternary or quaternary) through the manipulation of its constituent composition. In this thesis, It is focused on two different III-V-based compound semiconductor materials, Ga(NAsP) and...

Reviews

I actually started off reading this article ebook. It is writer in simple phrases instead of hard to understand. Once you begin to read the book, it is extremely difficult to leave it before concluding.

-- **Dessie Witting**

Absolutely among the best publication I have at any time go through. It is definitely basic but shocks from the 50 % of the book. I discovered this book from my i and dad advised this publication to find out.
